**For those
'enjoy every day'
moments.**

_____ vinyl planks & tiles.

A floor that's made for every day.

Life-proof and waterproof

A spilled juice box, a baby's food tantrum, a puppy in training... Relax! These floors are not only stunningly beautiful and waterproof, they will also take anything life throws at them. You'll be grateful for the quick clean-up too. Don't feel like picking a different floor for every room? There's an easy solution: just install Live in all the rooms – kitchens and bathrooms too. You'll surely make all your friends jealous with Live's stylish, natural aesthetic.

Always the right temperature

Crank up that thermostat when it's cold outside! These floors will keep your feet toasty and warm: they support underfloor heating and can readily handle heat fluctuations, so you're fine installing them in front of large windows. Better yet, because they're light, rigid, and only 3.8 mm thick (due to the patented rigid composite board), you can simply install them over the already existing floor. The perfect solution: a home makeover with zero effort!

Dream floor, DreamClick®

Place your floor in no time with our super quick, easy and extremely user-friendly DreamClick® installation system. Unlock your inner artist and mix and match different colours, planks, and tiles. Define your own taste with expertly matched stone and wood colours. And all of this is possible in an eco-friendly way – our Live collection is fully recyclable and also contains a high amount of recycled content.

A unique extension to your way of life.

Stressed out about work? No time to tidy up? Has your toddler been drawing on the wall or did your cat decide the sofa was an excellent scratching pole? We get it – you have a lot to deal with. Everyday life can be unpredictable. Messy. Chaotic. But there's one thing you don't need to worry about. And that's your floor. The warm, natural colours open the door to nature. It's easy to clean and easy to install. Live the life you want to live. Live, by BerryAlloc.

A dream to install.

Install floors twice as fast with DreamClick®

These floors are your solution for a quick and easy installation process. Our 360° DreamClick® installation system is a delight to work with. If you can assemble furniture, you can install this floor. Did you know that it installs twice as fast than your regular installation system? Work in pairs to speed it up even more by starting in the middle and working your way outwards.

But how does it work?

All sides of the planks and tiles are fitted out with the same installation system, unlike the classic systems on the market. This provides infinite solutions for design and installation. You don't need many tools either for this floor: a simple cutter knife will do the job for a completely dust-free installation.

Easy to replace

Our floors are tough, made to withstand the trials of life. But a dent or scratch is sometimes unavoidable. What then? Our DreamClick® system makes it incredibly easy to remove just one single plank or tile. That dent from that really heavy thing with sharp corners you dropped? It can be gone in five minutes. Phew!

It's all in the details.

Your Live floor is going to be awesome, but you can make it even better with our various accessories. Our Dreamtec+ and Basetec underlays reduce noise and will flatten out minor defects in your subfloor. Round out your floor with a choice of paintable skirtings – go for that lemon yellow wall you've always dreamed of! Finally, create a smooth transition between other floors with the right profiles for that finishing touch.
